About content..... **Positive involvement** Maintain a positive focus, staying carm

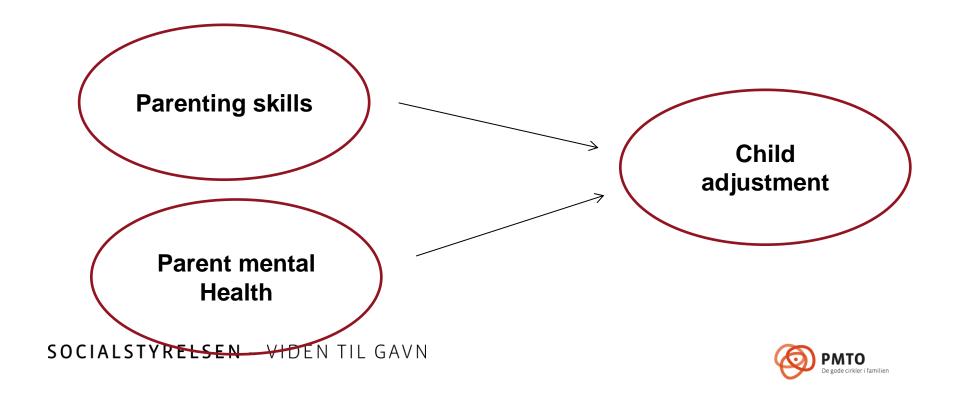

Parenting in formerly homeless families Gewirtz, A.H., Uni. Minnesota, Degarmo D.S. OSLC m.fl.

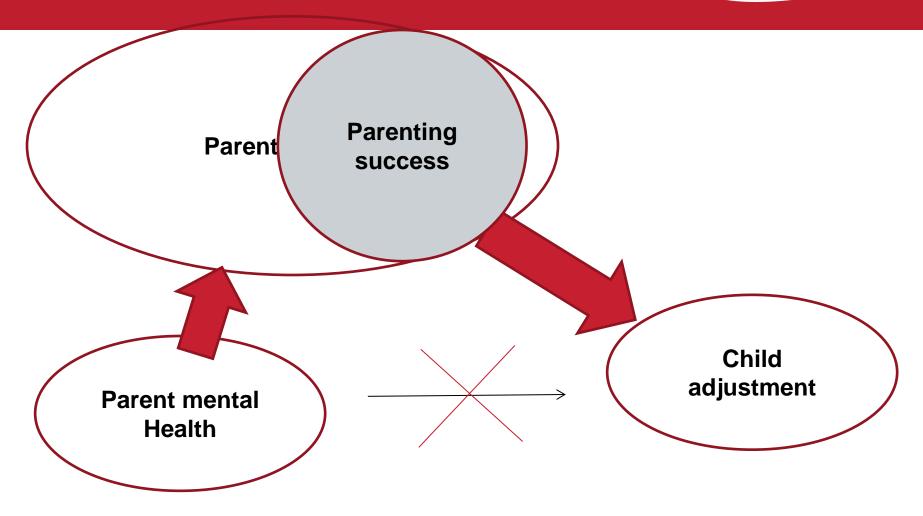

The study examines how parenting skills, especially in high stress families affect children's adjustment and how parents' mental health affect children's adjustment.

Parenting in formerly homeless families

The Theory of Change Spreading the joy

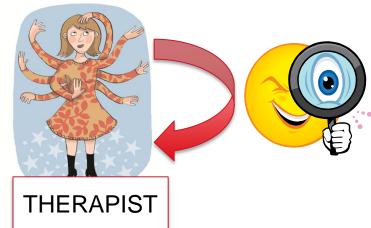

PMTO Modifies the theory of coaching

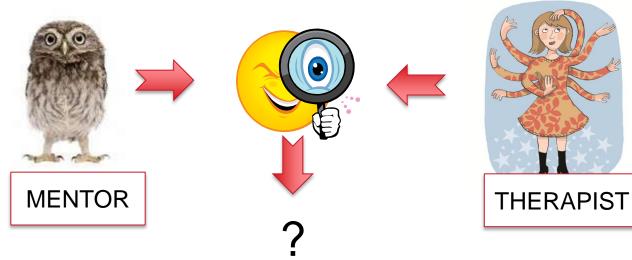

1. VIDEO

2. FIMP

3. PMTO COACHING

And it pays Cost Benefit Analysis

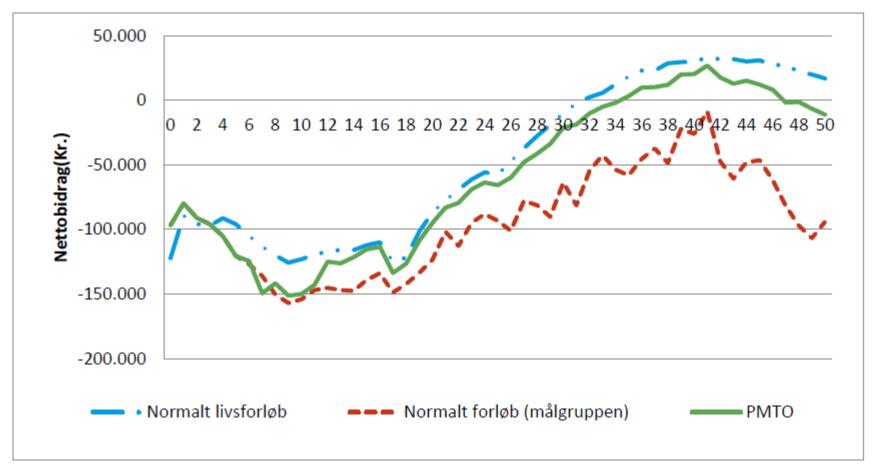

- Conclusions on the economic potential by introducing PMTO
- Nationally, there are approx. 5,000 children aged 4-12 years who received a preventive intervention (2012 figures)
- conservatively set success rate of 15 per cent., do not overestimate the program's true power.

Long-term effects

Conclusion

Tabel 7: The Total potential of PMTO
